Frame sizes

240x240cm
height 25cm (border)

JUNGLE BLOCKS - APPLICATION

Plug & play

Jungle Blocks are designed to cope with heavy wind pressure and can be placed modularly on flat surfaces like roofs without being anchored to the surface below.

The base tree element can be either installed individually or connected to other Jungle Blocks, to shape a (rooftop) landscape. The square Jungle Block Tree element can also be combined with Jungle Boxes.

Benches are available to be mounted on the tree element for providing seating capacity.
