Delivered on	Pallets
Saturated weight	650kg/m3

Funghi mulch	€ 160/m3
Supplied in	Big bags
Delivered on	Pallets
Saturated weight	650kg/m3

APPLICATION GUIDELINES

Supply

Jungle Mix is developed in close collaboration with and supplied by Kekkilä / BVB Substrates. Usual Kekkilä / BVB Substrates terms also apply for orders through The Urban Jungle Project.

The average lead time for orders is 3-5 working days (exceptions provided). Minimum order quantity for listed prices is a full truck load combined, unless agreed otherwise. Additional charges may apply for lower quantities.

Ordered volumes cannot be returned, unless agreed differently.

Execution

Jungle Mix can only be deposited from bigbags, blowing is not possible. Beware of dust during application.

To keep the lightweight substrate from blowing away, Jungle Mix can only be applied in combination with a top layer (Funghi mulch or flower mat).

Functionality

Jungle Mix has a strong capillary function, which works best when combined with a water buffering or retention layer below the substrate.

The organic matter facilitates durable plant growth. additional nutrients can be applied with fertilisation, through irrigation or manually.
